

**TUNGSTEN CARBIDE CUTTING/
HOLDING TOOLS & VENDING MACHINES**

**ADDITIVE MANUFACTURING (AM)
3D PRINTING SOLUTIONS**

ABOUT US

Multitrade Distributors, a South African company established in 1983 in Port Elizabeth, specializes in supplying tungsten carbide cutting tools, holding tools, and industrial vending machines to the engineering and manufacturing industries. As the exclusive distributor for Mitsubishi Materials products in Southern Africa, we've expanded to offer a range of international brands. With our head office in Johannesburg and branches in Cape Town, Port Elizabeth, and Durban, we also serve other areas through a network of smaller distributors.

Our experienced team takes pride in representing top-quality brands and providing expert support, including technical guidance and CNC programming. In response to the growing trend of Additive Manufacturing in South Africa, we launched a sister company in 2019, Multitrade 3D Systems (Pty) Ltd, specialising in high-quality metal Additive Manufacturing machines from GE Additive, Meltio, and AMAZEMET.

PRODUCT CATEGORIES

- Milling tools
